Cloud Motion or Smoothing

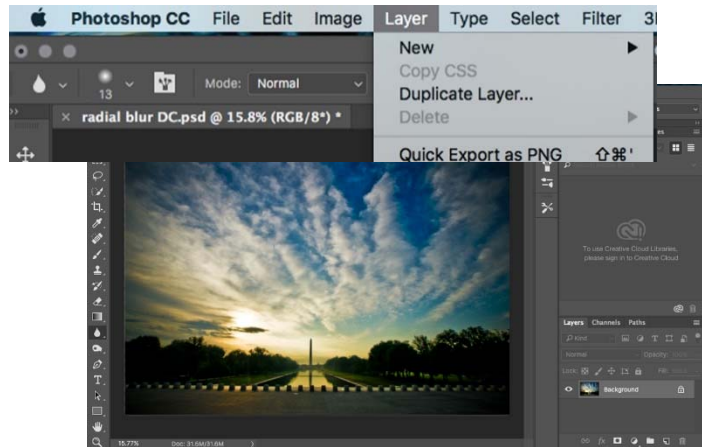

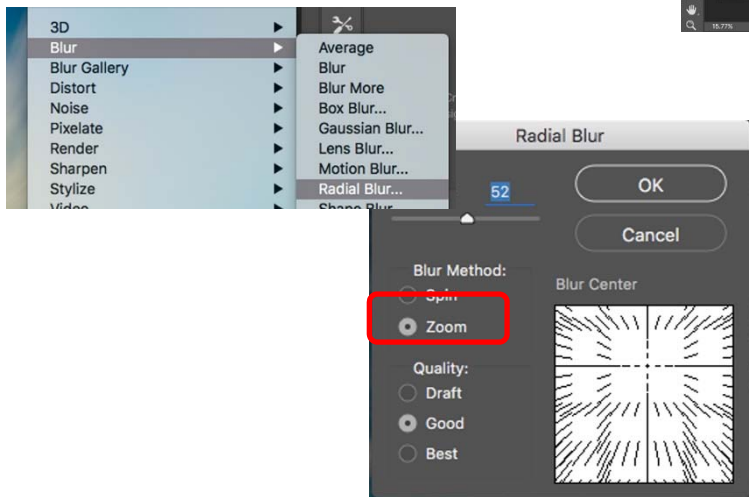

1. Select your shot with a dramatic sky and room to work with it.

2. Duplicate the layer

3. Chose new layer and go to Filter / Blur / Radial Blur (or Motion Blur). Choose zoom and dial in desired amount.

4. Add a mask to the blurred layer and paint with black on that layer to reveal the under layer portion you do not want blurred.

5. SaveAs .jpg and tweek as desired in Camera Raw…..Have Fun!
